DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings of record are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-26 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches a method for adaptively generating perceptually uniform printer characterization samples in a 3-D signal space comprising: generating polygon shapes in the 3-D signal space from perceptually uniform sampled line, calculating additional perceptually uniform sample points associated with each polygon and generating a final target in the printer 3-D signal space using the calculated perceptually uniform sample points as recited in claims 1 including all of the other features recited therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
